When using ChatGPT, providing more information in your prompts will help the AI generate more relevant and personalized responses. Here are some specific examples of information you can provide in your prompts:

- Title: This will help the AI understand the overall topic of your request.
- Genre: This will help the AI determine the style of the response.
- Event details: This will help the AI generate a response that is specific to your needs.
- Tone: This will help the AI determine the emotional tone of the response.
- Style of voice: This will help the AI determine the formality of the response.

Note: You can use generative apps like Google Bard or Bing Chat to get info past 2021.
